

Scientific Instruments CINEL s.r.l. was founded in 1979. Thanks to the technical-scientific skills acquired by the founding members within the Physics department of the University of Padua, Cinel developed over the years, specializing in the field of precision mechanics applied to the supply of instruments for the scientific research, in particular instruments used in synchrotron light sources and particle accelerators for basic research.

Strumenti Scientifici Cinel S.r.l. has always considered continuous technological evolution and transparency in the relationship with the customer as critical success factors for the company's growth. Thanks to the ability to innovate, the technical expertise of its staff and the ability to communicate with the customer, Cinel is able to best interpret their needs, promoting final satisfaction.

Based on the above mentioned points, Strumenti Scientifici Cinel has chosen to consider the following points as essential for its Quality Policy:

1. Satisfy and anticipate customer needs as much as possible by developing and creating profitable and sustainable products, in compliance with regulations, applicable laws and requirements imposed or generated by the analysis of customer requests. The objective is to support market growth while maintaining flexibility and product quality
2. Consolidate the approach based on "risk-based thinking" (philosophy based on risk analysis) for the definition and monitoring of effective and efficient organizational processes, in which the key performance indicators are reviewed annually by Top Management as part of the commitment to the continuous improvement program.
3. Support the growth of a corporate culture strongly focused on prevention rather than correction by implementing the voluntary ISO 9001:2015 standard, promoting evidence-based decision making.
4. Make the individual and the corporate community responsible for the importance of the Quality and Safety of their work, through targeted training activities and sharing of objectives.
5. Promote and enhance the company's human capital and its expertise.
6. Develop solid collaborative relationships with Suppliers with the aim of maximizing value creation, promoting mutual benefit and spreading a culture of Quality, Ethics and Safety
